

BULLARD) ABRASIVES®

Welcome to Bullard Abrasives located in Lincoln, Rhode Island. We manufacture grinding and cutting abrasive products for use on portable power tools. Our products are proudly made in the USA. We believe no other country can surpass the manufacturing excellence of US companies and Bullard stands tall among its peers by continually investing in our manufacturing operations. We know manufacturing plays a significant role in the health of the US economy – that is why we make it a point to partner with domestic suppliers for the high quality materials we need to produce our abrasive wheels. American companies working together to build better products, that's the essence of the American spirit and the foundation of our country's economic success.

Our mission is embodied in our responsibility to you – to deliver the best performing grinding and cutting wheels to make sure you get the job done. And with our commitment to quality throughout our entire manufacturing process, you can rest assured we're going to deliver on our promise.

Since 1927 | Made In The USA

BULLARD ABRASIVES®

From our Rhode Island based manufacturing facility we are in the business of engineering, manufacturing and distributing "best-in-class" cutting and grinding products for use on portable power tools. Our Bullard brand products are proudly made in the USA and can be used on a variety of materials used in the metalworking and construction industries. From shipbuilding to pipeline construction, automotive to aircraft, our products are designed to exceed the performance expectations of those who rely on abrasive products to do their jobs.

surfaces be warned...

The only way to finish.

TAF ABRASIVI and BULLARD ABRASIVES have united to supply world-class coated and bonded abrasives to professional markets throughout North America.
